WORMY MAPLE, NOW AVAILABLE ON ALL COLLECTIONS!

» FEATURE: WRM: WORMY MAPLE

» Shown with New species option **Wormy Maple**

» New Wood Species: Wormy Maple - Now available in all collections

Detail of Wormy Maple

Naturally Distinctive. Charming with dark heartwood streaks and authentic wormholes. This is an attractive choice for those who love the natural beauty of wood patterns. The dark and light boards combined with sap streaks make each piece a unique work of art. Especially when finished in Natural or lighter stains.

DID YOU KNOW?

The dark streaks and holes do not come from a worm... but from a beetle. Ambrosia beetles deposit larvae that then bore a shallow channel which causes the discoloration. This discoloration is not a defect it is structurally sound and adds interesting patterns to this striking hardwood. So we promise, No Worms!
